A Real Estate Investment Trust (REIT) is a company that owns, operates, or finances income-producing real estate across a range of property sectors. REITs allow individuals to invest in a diversified portfolio of real estate assets without directly owning the properties. These entities are required to distribute a significant portion of their income to shareholders through dividends.

2. **REIT Regulations**:

REITs are regulated by specific laws and regulations that govern their structure, operations, and tax treatment. These regulations are designed to ensure transparency, investor protection, and compliance with tax requirements. In the United States, REITs are subject to the regulations of the Internal Revenue Code (IRC) and the Securities and Exchange Commission (SEC).

3. **Compliance**:

Compliance refers to the act of adhering to the rules, regulations, and standards set forth by governing authorities. Compliance is essential for REITs to operate legally and ethically, avoiding penalties, fines, or legal action. Compliance encompasses various aspects such as financial reporting, tax obligations, and disclosure requirements.

4. **Internal Revenue Code (IRC)**:

The Internal Revenue Code (IRC) is a set of federal tax laws in the United States that governs the taxation of individuals, corporations, and other entities. REITs are required to comply with specific provisions outlined in the IRC to maintain their tax-exempt status and receive favorable tax treatment.

5. **Securities and Exchange Commission (SEC)**:

The Securities and Exchange Commission (SEC) is a regulatory agency in the United States that oversees the securities industry, including REITs. REITs that are publicly traded are required to register with the SEC and

comply with disclosure and reporting requirements to provide investors with accurate and timely information.

16. ****Prohibited Transactions****:

Prohibited Transactions are activities that REITs are not allowed to engage in to maintain their tax-exempt status.
