
Professional Certificate in Joint Force Command and Operations

Strategic Communication and Information Operations

Strategic Communication is a coordinated and integrated approach to communicating with stakeholders to achieve organizational goals. It involves the use of communication strategies, tools, and techniques to inform, influence, and engage audiences in support of an organization's objectives. In the context of the Professional Certificate in Joint Force Command and Operations, strategic communication is a critical component of information operations and is used to shape the perceptions and behaviors of key audiences in support of military objectives.

Key terms and vocabulary related to strategic communication and information operations in the context of the Professional Certificate in Joint Force Command and Operations include:

1. Information operations (IO): IO is a coordinated set of activities that the military uses to influence, disrupt, corrupt, or protect information and information systems. It includes four main elements: electronic warfare, computer network operations, psychological operations, and military deception.
2. Psychological operations (PSYOP): PSYOP is the use of information and communication techniques to influence the emotions, attitudes, and behaviors of target audiences. It is a key component of information operations and is used to support military objectives by shaping the perceptions and behaviors of key audiences.
3. Target audience analysis (TAA): TAA is the process of identifying and understanding the characteristics, motivations, and behaviors of the target audience. It is a critical component of strategic communication and information operations, as it helps to ensure that communication strategies and tactics are tailored to the needs and preferences of the target audience.
4. Messaging: Messaging is the development and dissemination of clear, consistent, and compelling communication content. It is a key component of strategic communication and is used to inform, influence, and engage audiences in support of organizational objectives.
5. Media relations: Media relations is the process of working with the media to communicate organizational messages and build positive relationships with key audiences. It is a key component of strategic communication and is used to reach and influence a wide range of audiences through the news media.
6. Public affairs: Public affairs is the process of communicating with the public to build understanding and support for organizational objectives. It is a key component of strategic communication and is used to inform, educate, and engage the public on issues related to the organization.
7. Crisis communication: Crisis communication is the process of managing communication during a crisis or emergency situation. It is a key component of strategic communication and is used to provide accurate and timely information to key audiences, protect the organization's reputation, and prevent or mitigate negative

consequences.

8. Social media: Social media is a platform or tool that allows users to create, share, and exchange information, ideas, and experiences online. It is a key component of strategic communication and is used to reach and engage with audiences in a dynamic and interactive way.

9. Influence operations: Influence operations are coordinated and integrated efforts to shape the perceptions and behaviors of target audiences. They are a key component of information operations and are used to support military objectives by influencing the attitudes and behaviors of key audiences.

10. Information warfare: Information warfare is the use of information and communication technologies to attack and defend information and information systems. It is a key component of information operations and is used to disrupt, corrupt, or protect information and information systems in support of military objectives.
